[Here's Why Proxies Are More Relevant Than Ever](#)

AN ENTIRELY NEW WAY TO SCRAPE

"After eight grueling months, five developers, and thousands of dollars, ScraperBandit is finally here."

There's a better way to scrape Google. A much better way. Something that manages all of the server usage, all of the proxies, and all of the link handling. Something that scrapes 200 million links in a day instead of a month. Something that runs unlimited campaigns, allowing results to constantly transfer.

That something is here. And it's called ScraperBandit.

FEATURES	GScrapecr	Scrapesbox	ScraperBandit
Simultaneous Campaigns	X	X	✓
Hands-free	X	X	✓
Web-based	X	X	✓
Auto Dropbox and FTP Upload	X	X	✓
Speed	X	X	✓
Hard Footprints	X	X	✓
Proxies Required	✓	✓	X
Pre-loaded Footprints and Keywords	X	X	✓

RUN MULTIPLE CAMPAIGNS.

Life doesn't wait. Your projects shouldn't have to either. Our service allows you to run multiple campaigns at the same time. So, while your competitors are monitoring their server every hour, you'll be immediately uploading all your jobs at once with us.

KEEP IT HANDS FREE.

Our system does all the leg work. From de-duping URLs/ domains, to uploading your results to a main Dropbox file, you'll enjoy the ease of focusing on the things that really matter - building backlinks.

EXPERIENCE WEB-BASED.

Access your campaigns from anywhere, even from your mobile phone. No leasing servers, server costs, or arranging remote desktops. With ScraperBandit, you're always in control.

SPEED THINGS UP.

Stop waiting for your current scraping software to meet your needs. Our servers run at over 200,000 links per minute. Faster scraping leads to more results. And more results is what puts you ahead of your competitors.

HARD FOOTPRINTS FIGHT HARD.

If you run "hard" footprints through GScrapecr or Scrapesbox, your process can be banned in minutes. Our source of proxies doesn't even finish. Stop wasting time fighting banned proxies. We'll handle it for you.

START SCRAPING IN MINUTES.

You no longer have to scourge the web or worry about setting your footprints or keywords. It's simple. Select one of our pre-loaded footprints and/or keyword lists, and you'll be scraping in no time.

KISS PROXIES GOOD-BYE.

Scraping Google requires top-quality proxies. And even those proxies get banned with hours of normal scraping speed. Through unique partnerships, we provide scraping without requiring any proxies from you. We handle all of it.

DO THE MATH.

GScrapecr and Scrapesbox (7/2016):
 -\$40/month in server costs
 +\$80/month for proxies
 +\$50 for the software
 = \$170/month for 21M links (see server list for more)

ScraperBandit (US):
 It takes us less time. It costs you less money.
 = \$64 for 21M links (see server list for more)

SKEPTICAL? FIRST ROUND'S ON US.

By signing up today, you will receive 100,000 link credits to start scraping with us. We're also introducing an Early Bird price of \$3,000,000 per link. That's \$3.00 per 10 million links.

Try ScraperBandit today and experience scraping in an entirely new way.

*Prices will increase after Early Bird pricing. We are not affiliated with GScrapecr, or Scrapesbox in any way.

"This service literally takes away your scraping work. It costs less for running a scraper + proxies, VPN, ensuring in general, it's a set and forget / plug and play system, it's continually aware for its clients, the only thing you've got to make sure of, is to have the resources to process these lists.

Nobody should have to purchase lists anymore with something like this, this has taken the tedious task of scraping and costs costs dramatically. I mean, \$5 for 10,000,000 URLs, with some of the list sellers selling lists for around \$50 each for up to 100,000 links... You can obtain 100,000,000 potential targets for that price alone.

All you need is keywords + footprints.
This service is practically a no-brainer for anyone that harvests their own URLs. It takes away the need of having additional proxies/server for scraping and also increases productivity."

"I've only been beta testing for a an hour so but so far this thing is pretty impressive. I think one of the best parts about the service is that anyone can use it without having any prior scraping knowledge.

As long as you understand how footprints/keywords work, you can start scraping right away.

Here's the steps it takes to start scraping:

- Click create project
- Name your campaign
- Enter keywords
- Enter footprints
- Click start campaign

It really doesn't get any easier than that.

The UI is very clean and straight forward.
The scraping speed is very fast - I got my results returned in a matter of minutes.
Not having to use and burn through my own proxies is a huge plus
Not having to use my own server resources is another big plus

My first small test run:
Loaded 22 article footprints (pulled directly from SERP)
Loaded 11 random keywords

Results:
Unique URLs: 11187
Unique Domains: 4349

After identity and sorting, about 18% of URLs were recognized as possible by SERP:

Keep in mind this was using just a very small sample of 11,000 URLs. Loading in 1,000,000 URLs should yield some pretty good results."

"I thought I used what I call the SafeScrape footprints and a keyword list from Donald Beck. It's just contextual, Web 2.0, articles, Wikis and Social Networks.

I dumped 101 keywords and all the footprints.

A few hours later I got this:

Thanks for offering ScraperBandit.
Your campaign SafeScrape-Keywords20 has finished.

438017 links found.
181026 unique links found
35431 unique domains found

Never would have completed this on my home VPN using Scrapesbox. It would have taken 24 hours to complete if not here.

That's just amazing. Already at \$8 submitted so far. It will take time as these aren't just trackbacks, blog comments and such but wow... so damn fast."

"This is just unbelievable! I scraped just in 30-40 minutes a list that would take a month with Scrapesbox. This is not normal. All I can say, thanks for testing your tool. It's a tool that a lot of people willing to pay for. TH 100% SURE."
